PROJECT SUN STREAK (U)

WARNING NOTICE: INTELLIGENCE SOURCES AND METHODS INVOLVED

Session Procedures Report (S/NF/SK)

PROJECT NUMBER: 8711

SESSION NUMBER: 3

DATE OF SESSION: 23 JULY 87

TARGET COUNTRY: IRAN

REFERENCE:

MISSION STATUS:

TECHNIQUE UTILIZED: CRV

SOURCE IDENTIFIER: 003

SG1A

1. (S/NF/SK) Monitor Tasking: Identify and describe the placement and

2. (S/NF/SK) Source Tasking: (Monitor revealed to source that the target "objects" were missiles)

- Source was directed to describe the future displacement and new location of the missiles

- Source was moved around the locale (psychically) so as to be able to render the area in a sketch

3. (S/NF/SK) Summary: There seem to be several, perhaps three, missiles. In about a week to ten days, they will be moved to an underground area towards the north, "nearer" to where they could be used. (See source sketch of the trucks used to transport the missiles and the area sketch).

4. (S/NF/SK) Comments: Although the source did not volunteer the word "missile", this monitor feels quite confident in the validity of the source's perceptions.

~~SECRET~~/NOFORN-SKEET CHANNELS ONLY

CLASSIFIED BY: DIA-DT  
DECLASSIFY : OADR

~~Objects~~ are inside containers and are in pieces that ~~must be~~ assembled to be used. They are rounded (cylindrical) and are made of metal and plastic. ~~Monter~~ ~~disclosed~~ they were missiles. Current location is within and old, warehouse-like room with the windows obscured; they are secured and protected. There are more than one--a "few"--of these objects, perhaps three. The building in which they are located is in ~~a urban area~~, "like" a run down, partially abandoned part of the industrial area of a third-world city. It is very hot and oppressive in this area. Idea of a "Mexican City" suggested as AOL. Objects are due to be moved within one week to ten days ~~toward north~~ ~~where~~ "where they could be used. They are moved in two-~~axle~~ trucks which are covered and have dual wheels on the back. There are two of these trucks, which have a narrow nose with horizontal ventilator strips cut in the grill, and are dark colored. The objects are moved at night. One truck could carry them, but two are used for security. Objects are moved to a location and stored in a ~~structure that is partly underground~~ and which inside has beams and supports. It reminds me of a large, earth-insulated potato shelter with part of a structure or house left on top. ~~Structure was abandoned for its original purpose long ago and is now being expropriated for this purpose.~~ It is located near a poorly maintained, narrow, paved secondary road. South ca. 20km the road goes through a low pass bounded by long, dry, rocky hills/ridges. West ca. 20km is another north-south running ridge, higher, behind which are structures and houses. Further in that direction a moderate distance is a very large body of water. East ca. 20km is a built up area that extends along a road-river artery leading north. North ca. 20km is a large, flat, green area with trees that seems to be some sort of farming area. General terrain seems arid and austere.
